MOOSE BROOK WILDLIFE MANAGEMENT AREA

(BARRE)

MOOSE BROOK WILDLIFE MANAGEMENT AREA

(Barre)

SIZE: 190 acres comprised of two large parcels off Sheldon Road, and a small parcel providing brook access off Old Hardwick Road. The two large parcels contain moderately to steeply sloped ridges and large areas of shrub swamp.

VEGETATION: Mixed hardwood and conifer forest with shrub swamp and open marsh along the headwaters of Moose Brook. A few old agricultural fields are interspersed throughout the area.

WATER: Moose Brook is a cold water stream draining from two large swamps. There are some marsh impoundments due to periodic beaver activity. Native brook trout can be found in the brook.

WILDLIFE: Grouse, deer, gray squirrel, fox, waterfowl, turkey, aquatic fur-bearers and numerous nongame species. This area is **not** stocked with pheasant.

SPECIAL

REGULATIONS: None.
